

Event-study estimates around adoption

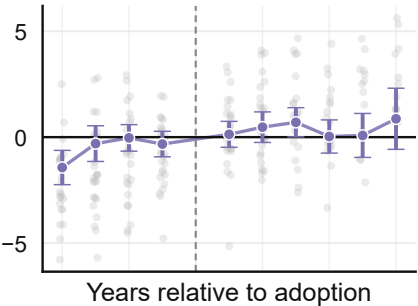

A. Firearm Suicide

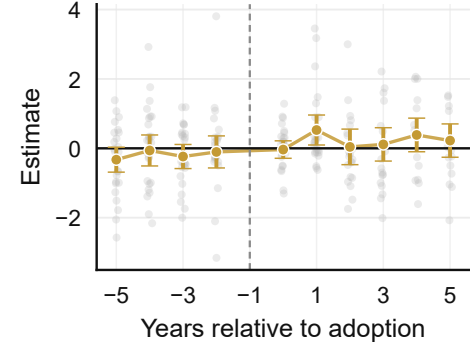

B. Total Suicide

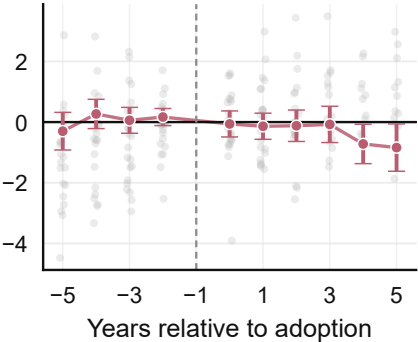

C. Total Firearm Deaths

D. Non-Firearm Suicide

E. Firearm Homicide

Reference period: year immediately before adoption. Whiskers show 95% confidence intervals; pale points show treated state-year deviations from that state's reference year.

Dynamic coefficients are plotted relative to the year before permitless carry adoption; background points show the underlying treated-state event-time data.
